

CONSTRUCTION INSPECTOR (FULL TIME OR SEASONAL)

Eng. is looking for highly motivated individuals with a background in construction to fill our seasonal (April – November) Construction Inspector roles. The selected candidates will act as on-site representatives for municipal construction projects throughout Michigan and will be responsible for performing construction inspections to assure compliance with codes, standards, plans and specifications. A successful applicant will excel in oral and written communication and maintain a working knowledge of construction operations. Full time positions are available for those applicants capable of other engineering and surveying skillsets during the winter months.

Primary duties include:

- Monitor construction activities to ensure accuracy and compliance with all codes, standards, plans and specifications.
- Perform field measurements for contractor payment and generating accurate depictions of completed construction work.
- Acting as a liaison between coworkers, clients, contractors and other consultants to keep project team up to date and coordinate as necessary.
- Generating detailed daily reports of construction activities and other required documentation.
- Oversees traffic control operations to ensure public safety and convenience.
- Reviews soil erosion and sedimentation control measures on a regular basis and generates necessary reports.

Minimum Qualifications:

- Completion of High School Diploma or G.E.D.
- 2 years of experience in general construction work.
- Ability to interpret technical drawings and contract specifications.
- Excellent written and oral communication skills.
- Flexible availability with frequent overtime and weekend work anticipated.
- Valid driver's license.

Preferred Qualifications:

- 3+ years experience in municipal construction (sewer, water, pathway, road).
- 2 years of college level construction/engineering courses.
- Previous construction inspection experience a plus.
